Protect, Rejuvenate, Lubricate  
with LubriSyn HA+

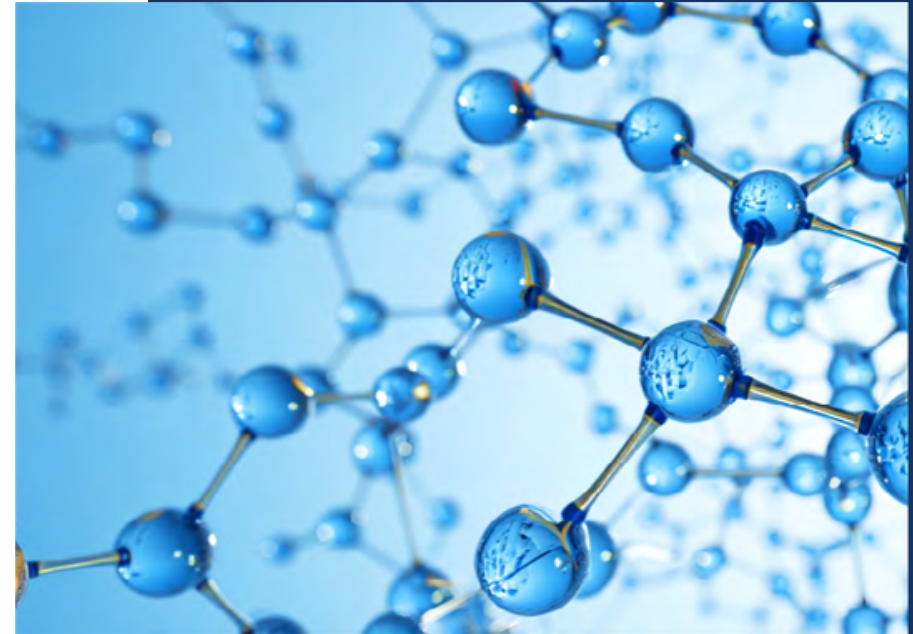

# The Science of Hyaluronic Acid

## What You Need To Know

- Healthy joints depend on healthy synovial fluid.
- Synovial fluid is the fluid that lubricates your joints.
- Bio-identical Hyaluronic Acid – identical to the HA the body makes.
- High Molecular Weight HA (HMW-HA) proven in multiple scientific studies; the body's natural HA in healthy joints is HMW-HA.

**High Molecular Weight HA** is the key component that provides the necessary lubrication, viscosity, and elasticity for optimal joint function.

# Synovial Fluid Quality & Ageing

## As We Age, Why Does Synovial Fluid Quality Decline?

1. With age, less **High Molecular Weight HA** produced by our bodies and more fragmented low molecular weight HA remains which causes inflammation.
2. High molecular weight HA protects against inflammation, ageing, and joint disease.
3. Quality synovial fluid provides lubrication, viscosity and elasticity for the joint.
4. Quality synovial fluid contains high levels of HMW-HA.

Healthy young joint

Bio-identical HA deficiency

Ageing unhealthy synovial fluid

Bio-identical HA supplementation

# Our Story & Development

## Who Created the Solution

Lubrisyn HA+ was developed by renowned specialist Dr. Steve Allday. He knew the power of bio-identical HA, but it was only available as an expensive injection. He developed LubriSyn HA+, the first bio-identical HA supplement, natural, safe and effective.

### The Challenge

Dr. Stephen Allday recognised the power of bio-identical HA, but it was only available as an expensive injection.

### The Innovation

He developed LubriSyn HA+, the first bio-identical HA supplement that was natural, safe, and effective.

### The Result

A revolutionary formula that provides circulating hyaluronic acid to aid in healthy joint function.

“ LubriSyn is the best way to provide circulating hyaluronic acid to aid in healthy joint function. Nothing works more directly than HA ”

Dr. Steve Allday  
Developer - LubriSyn HA+

# Synovial Fluid Quality & Ageing

## What Our Customers Say

“ I’ve been a runner for years. Mostly recreational, but I’ve done a few half marathons. I take LubriSyn because I want to keep running and believe me when you wake up in the morning you know the difference. I had tried lots of other stuff but this is a quality product. ”

**Eileen Walsh, 63, Former Runner**

“ Since we retired, I know it’s so important to stay active. Use it or lose it! Last year some of my friends had to give up playing golf. I thought I was also going to have to stop but then I discovered LubriSyn. Every morning I take it first thing and it doesn’t interact with my medication. It makes some difference though. I’m as fit as ever and I intend to stay that way. ”

**Jennifer Rice, Keen Golfer**

“ I’m taking LubrisynHA+ since just before the pandemic. It works, it’s like the WD-40 I have in the shed. I was struggling, especially with my right hip. I’d be far less active now without it. ”

**Martin Hoban, 74, Active Gardener**

# Will the real HA please stand up?

## The Source of HA

What your customer needs to know vs. what other brands won't tell you!

Feature	LubriSyn HA+	Other Brands
Quality	✓ Highest Quality HA	✗ Low Quality Degraded HA
Size	✓ High Molecular Weight HA (>2,000,000 Daltons)	✗ Low Molecular Weight / Fragmented HA
Source	✓ Cutting-edge Innovation ✓ Patented Bio-Fermentation Production	✗ Chemically Extracted from Chicken and Shark Cartilage
Form	✓ The Only Liquid Bio-Identical HA Supplement ✓ Rapidly Absorbed, Highly Effective	✗ Powder, Capsules or Tablets
Purity	✓ High Purity ✓ High Quality	✗ Full of Impurities (Chemicals and Proteins). ✗ Easily Manufactured ✗ Cheap, Degraded HA
